

FLEXIGRANT®

DATA MIGRATION

Data migration is a critical process and it requires careful planning and execution to ensure that data is transferred accurately and securely.

We offer several methods of data migration and the most effective approach involves your team collaborating closely with us, to help facilitate this, we will organise a data migration workshop.

Ensuring your data is in optimal condition before migration helps prevent the importation of duplicated, incomplete, or unnecessary data.

Data Migration Options

Enterprise Data Migration - Our enterprise data migration service is designed to streamline the transfer of substantial volumes of data, encompassing finance data, scheme data, contacts and applications. Enterprise data migration demands careful planning and collaboration to ensure a seamless and successful transition.

Data Import Tool - Following a thorough consultation, our team may recommend leveraging our application import tool which is designed to import existing applications and grants, this includes the status, key project information and contact details for each application.

Payments Migration- For organisations with more focused migration needs, we may recommend the payments migration option. This service is exclusively for the seamless transfer of historic payment data, including payment dates and amounts.

Application Form Data Migration- In addition to our comprehensive data migration services, we offer the migration of application form data. Our process involves the careful mapping of question bank questions to the respective application forms, ensuring a seamless and accurate transition.

Contacts Import Tool - In addition to the application import tool, we offer a contacts import tool that allows the bulk import of people (for example reviewers) and organisations.

Data Migration Cost

Our suite of data migration solutions necessitates a thorough evaluation of your current system and data volumes.

Following this analysis, we could then deliver a tailored quotation for your consideration.
