

FLEXI-GRANT®

CONFIGURATION

REVIEW

Do you ever stop to ask whether or not your organisation is maximising the potential of your Flexi-Grant system to manage your grant funding portfolio?

If it has been several years since Flexi-Grant was first configured, then perhaps you might want to consider taking a moment to think about some of the pain points you are currently faced with.

We are continually making improvements to Flexi-Grant, and it is quite possible that there are new features that could mitigate some of your pain points and improve your processes.

Our configuration review is designed specifically with you in mind!

We know Flexi-Grant intimately and have configured the product for more than 100 clients over the years.

We want our clients to benefit from our experience, by helping you to maximise the potential of Flexi-Grant, so that the majority of your time is dedicated to supporting the sector and communities you serve.

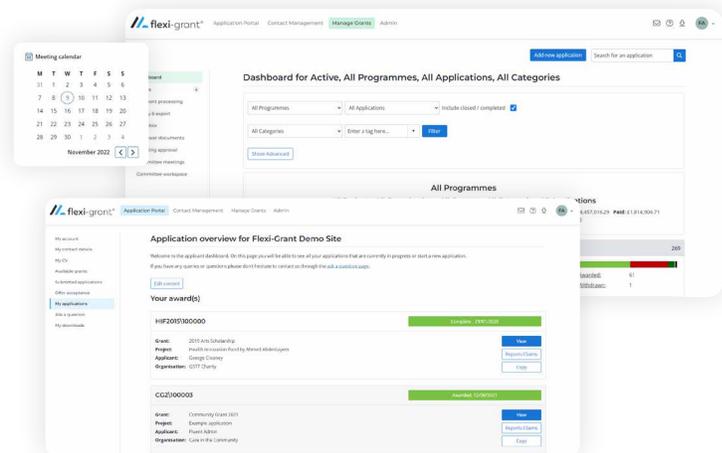

What is a Configuration Review?

A member of our highly experienced implementation team will engage directly with your super user(s) to conduct a thorough examination of your current instance of Flexi-Grant.

The review will allow us to identify currently enabled features and assess how they are being utilised to support your processes and how closely they align with the tools and workflow stages available.

In addition, we will review the pain points you have identified, and will assess whether there is a training need to ensure that you have the capability to manage the system independently.

Following the review we will provide you with a summary of our findings and recommendations for making improvements to alleviate and mitigate any issues identified. These can be actioned internally or with the help of a Flexi-Grant consultant.

Why do you need a Configuration Review?

Process improvement - standardising and simplifying your current practices to help fully systemise your workflow and recommend introducing new features to improve efficiency.

Risk management - ensuring that you benefit from the permission and authorisation controls of the system to safeguard your organisation from exposure to risk.

Independent ownership - assessing the capability of users to independently manage and improve the system for your everyday needs, which may identify a training need or areas to enhance your knowledge.

Maximise value - By understanding how your team uses Flexi-Grant you can ensure they get the very best value from the software.

What is the pricing of a Configuration Review?

Configuration Reviews start from £995 (excluding VAT at 20%).
